Nome: _____ Data: __/__/____

Atenção:

- 1 – Obrigatório o nome da dupla nos arquivos .java na forma de comentários.
- 2 – Deverá entregar o projeto em forma compactada (toda a pasta)
- 3 – Mandar junto um print de tela com os dados populados no banco de dados e na apresentação dos funcionários desta atividade.
- 4 – Diferencial: Criar uma página específica para créditos da dupla.

CRUD in Servlet

Uma aplicação CRUD (Create, Read, Update and Delete) é a mais importante aplicação para um projeto de desenvolvimento de software. Usando Servlet, Podemos facilmente criar um CRUS.

Exemplo de CRUD Servlet

Criar uma tabela ([user905](#)) no banco de dados MySQL ou outro de sua opção com um id autoincremento usando sequency. Existem 5 campos, sendo eles: id, name, password, email and country.

Column Name	Data Type	Nullable	Default	Primary Key
ID	NUMBER	No	-	1
NAME	VARCHAR2(4000)	Yes	-	-
PASSWORD	VARCHAR2(4000)	Yes	-	-
EMAIL	VARCHAR2(4000)	Yes	-	-
COUNTRY	VARCHAR2(4000)	Yes	-	-
1 - 5				

Arquivo: index.html

```
1.      <!DOCTYPE html>
2.      <html>

Resultado .

The screenshot shows a web browser window with the address bar displaying 'localhost:9765/CrudServlet/'. The page title is 'Add New Employee'. The form contains the following fields and controls:

- Name:
- Password:
- Email:
- Country: (dropdown menu)
-
- [view employees](#)

Teremos a mensagem "Record successfully saved!".

Nome: _____ Data: __/__/____

Nome: _____ Data: __/__/____

Record saved successfully!

Add New Employee

Name:

Password:

Email:

Country:

[view employees](#)

Click on the View Employees link to see the total employees list.

[Add New Employee](#)
